

COME DIG WITH US IN 2009

Dinosaur and other fossil digs in the scenic and rugged North Dakota badlands near Marmarth

Sixty-five to 75 million-year-old fossil sites containing dinosaur and other fossils have recently been discovered in the beautiful and rugged badlands near Marmarth, North Dakota. The North Dakota Geological Survey and the Marmarth Research Foundation, in cooperation with the U.S. Forest Service - Dakota Prairie Grasslands, will participate in scientific, professionally-conducted, fossil excavations at these sites in July 2009. Public participation is invited.

Triceratops

Who: Open to anyone 14 years or older

When: July 11 through July 18, 2009

Where: Marmarth, North Dakota
